Day: 18 (05-11-2026)	**Load data from snowflake and visualize data using Power BI**	Documented By:
Task – 2		Sujit T K

1.) Create a new database in snowflake

```
CREATE DATABASE AJI_DB_V3;
SHOW DATABASES LIKE 'AJI_DB_V3';
USE DATABASE AJI_DB_V3;
```

2.) Create a new schema

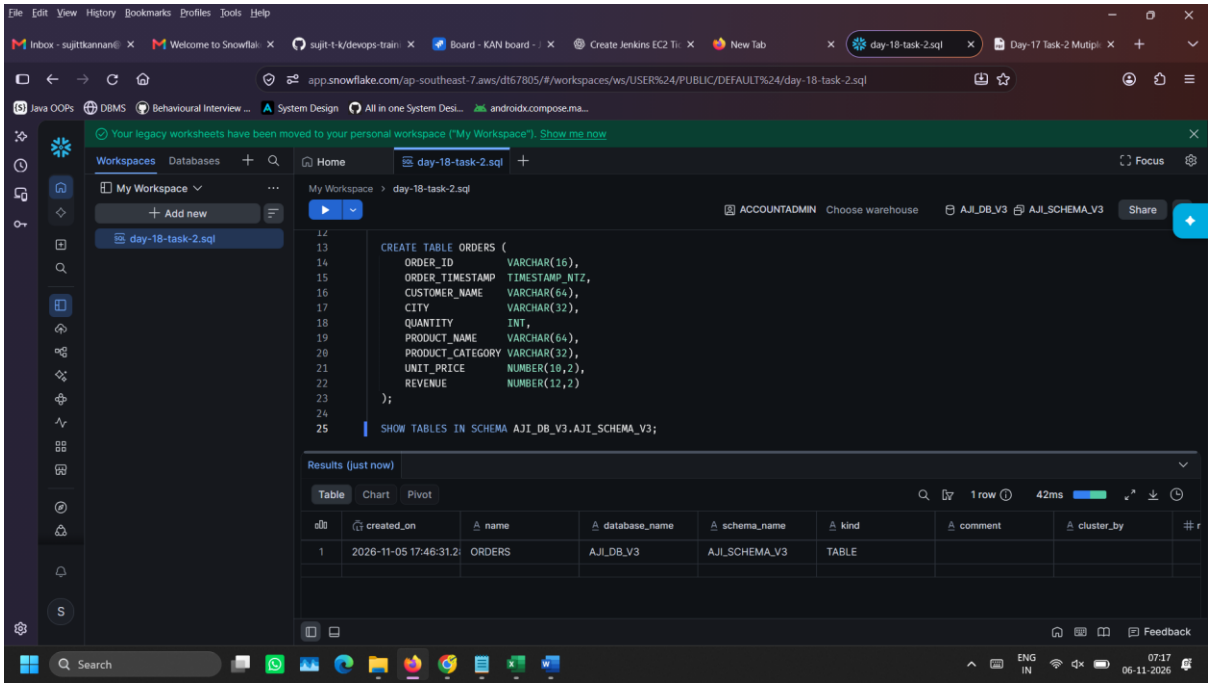

```
CREATE SCHEMA AJI_DB_V3.AJI_SCHEMA_V3;
SHOW SCHEMAS IN DATABASE AJI_DB_V3;
USE SCHEMA AJI_SCHEMA_V3;
```

3.) Create a table structure to hold data

```
CREATE TABLE ORDERS (
    ORDER_ID          VARCHAR(16),
    ORDER_TIMESTAMP   TIMESTAMP_NTZ,
    CUSTOMER_NAME     VARCHAR(64),
    CITY              VARCHAR(32),
    QUANTITY          INT,
    PRODUCT_NAME      VARCHAR(64),
    PRODUCT_CATEGORY VARCHAR(32),
    UNIT_PRICE        NUMBER(10,2),
    REVENUE           NUMBER(12,2)
);

SHOW TABLES IN SCHEMA AJI_DB_V3.AJI_SCHEMA_V3;
```

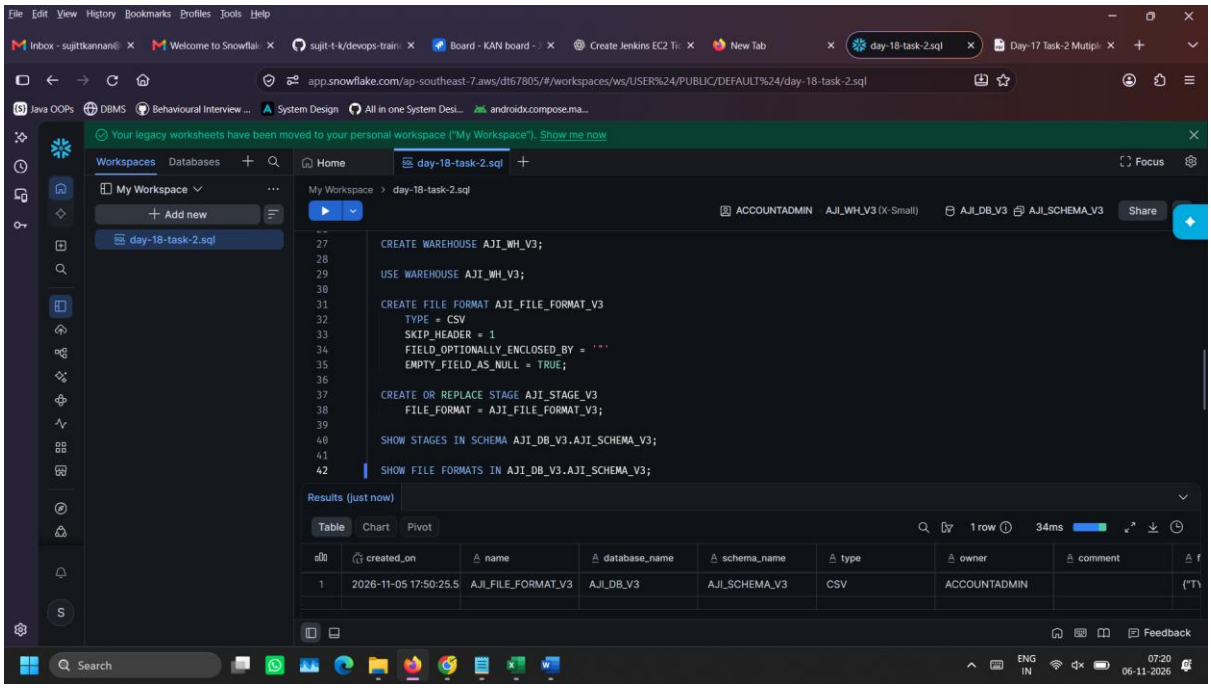

4.) Create warehouse, file format and stage to upload .csv file into snowflake environment

```
CREATE WAREHOUSE AJI_WH_V3;
USE WAREHOUSE AJI_WH_V3;

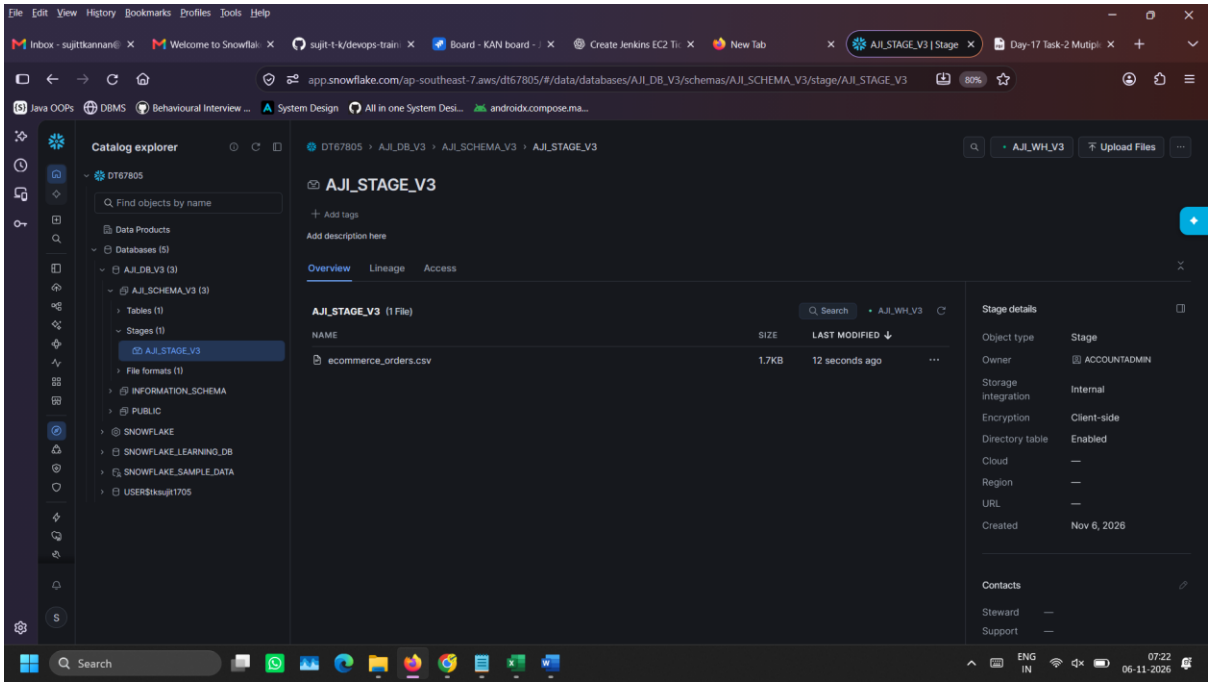

CREATE FILE FORMAT AJI_FILE_FORMAT_V3
    TYPE = CSV
    SKIP_HEADER = 1
    FIELD_OPTIONALLY_ENCLOSED_BY = '"'
    EMPTY_FIELD_AS_NULL = TRUE;

CREATE OR REPLACE STAGE AJI_STAGE_V3
    FILE_FORMAT = AJI_FILE_FORMAT_V3;
```

```
SHOW STAGES IN SCHEMA AJI_DB_V3.AJI_SCHEMA_V3;
SHOW FILE FORMATS IN AJI_DB_V3.AJI_SCHEMA_V3;
```

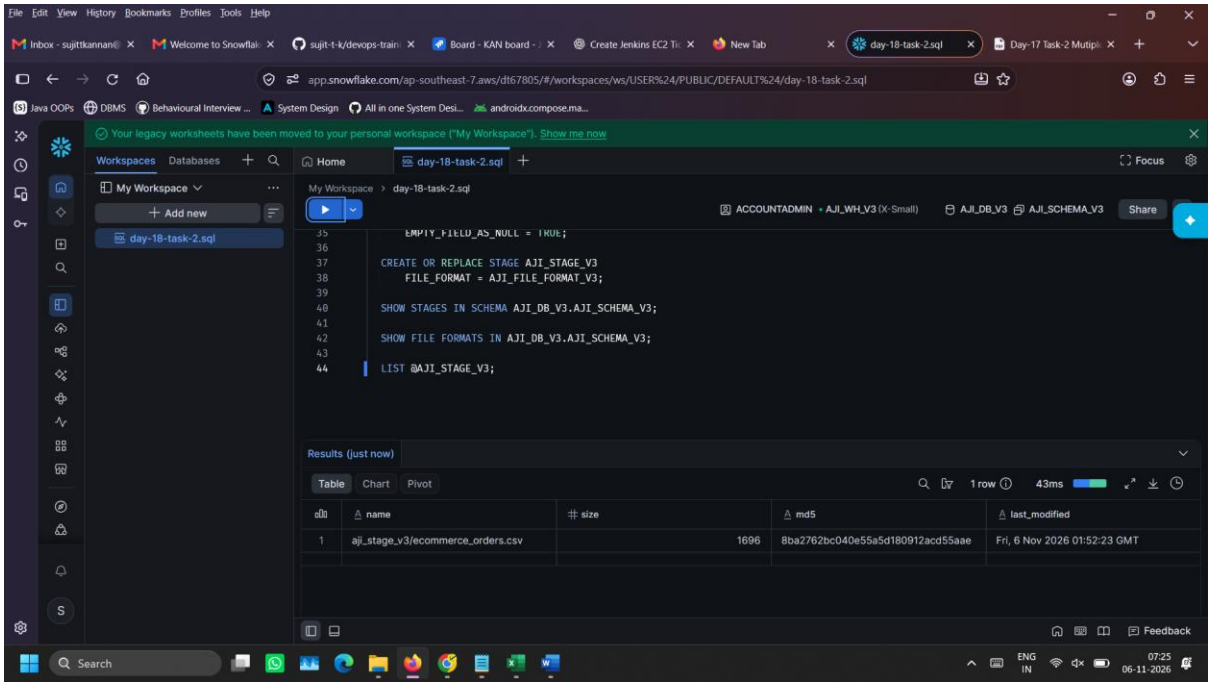

5.) Upload .csv file into the stage created going to Catalog > Explorer.

6.) View the staged data using SQL for verification

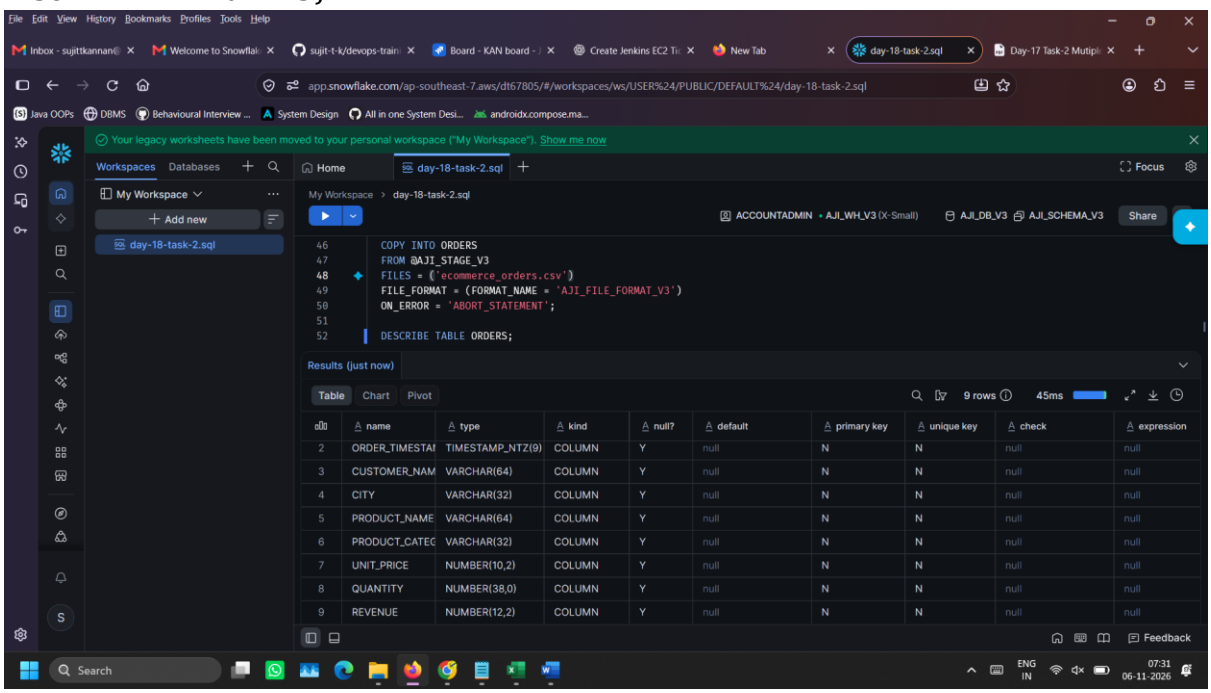

```
LIST @AJI_STAGE_V3;
```

7.) Load data from .csv into snowflake table using COPY INTO command and verify data load using DESCRIBE TABLE command

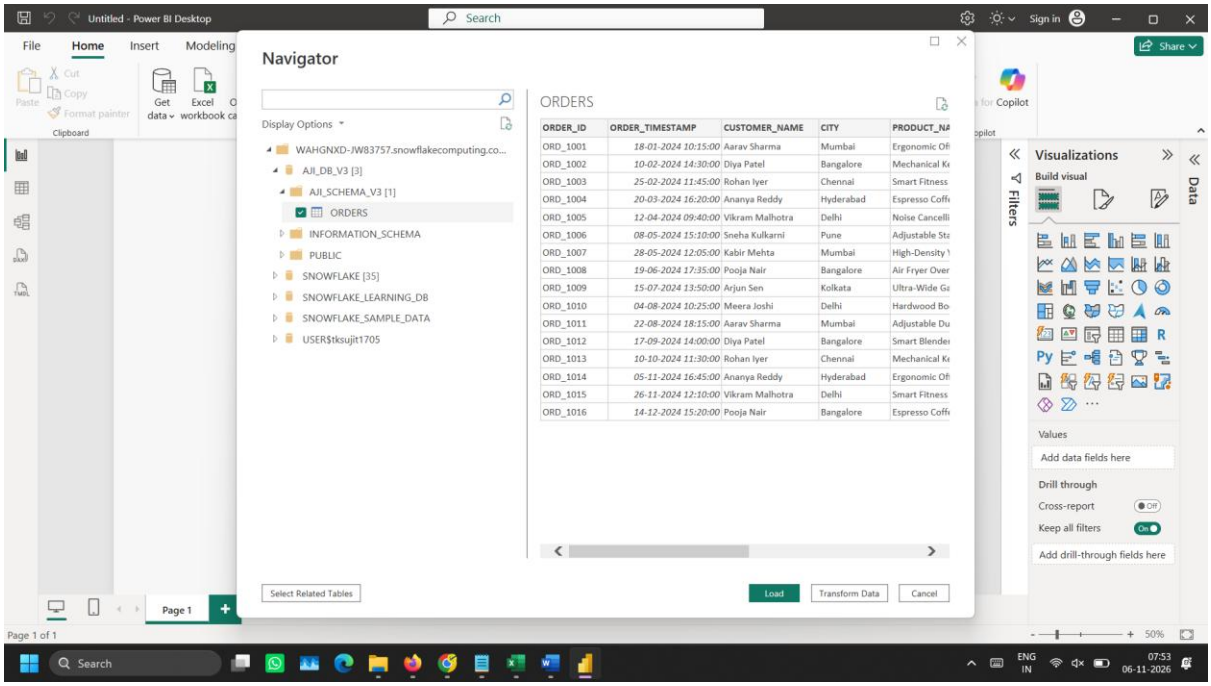

```
COPY INTO ORDERS
FROM @AJI_STAGE_V3
FILES = ('ecommerce_orders.csv')
FILE_FORMAT = (FORMAT_NAME = 'AJI_FILE_FORMAT_V3')
ON_ERROR = 'ABORT_STATEMENT';

DESCRIBE TABLE ORDERS;
```

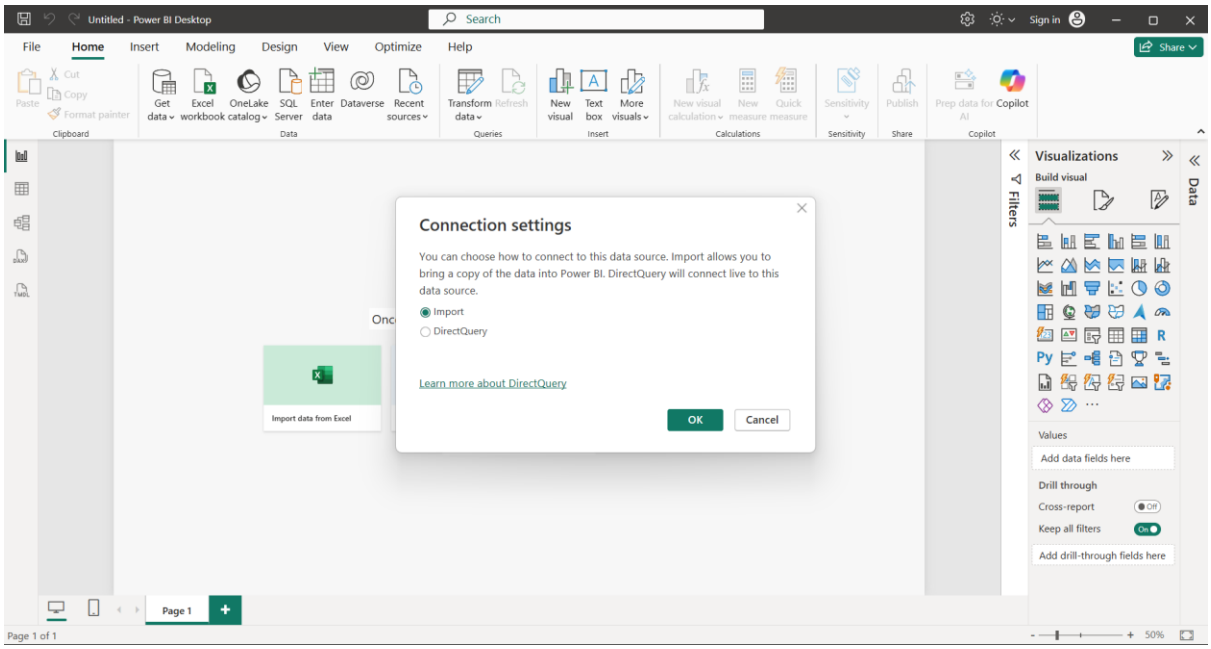

- Open PowerBI desktop and load data by selecting ‘Get data from other sources’

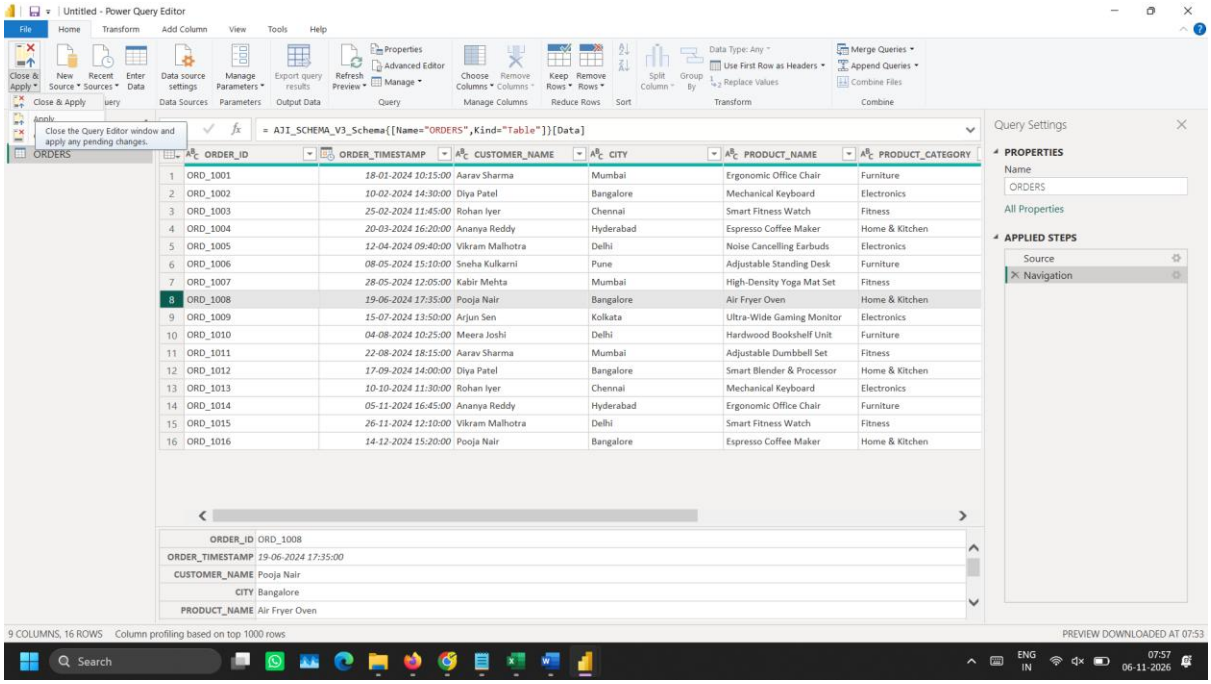

- Search for ‘Snowflake’ and then provide snowflake server URL and warehouse name.
- Authenticate with snowflake credentials if required.
- Then on navigator panel on right left side, locate the Orders table and press on ‘Transform Data’

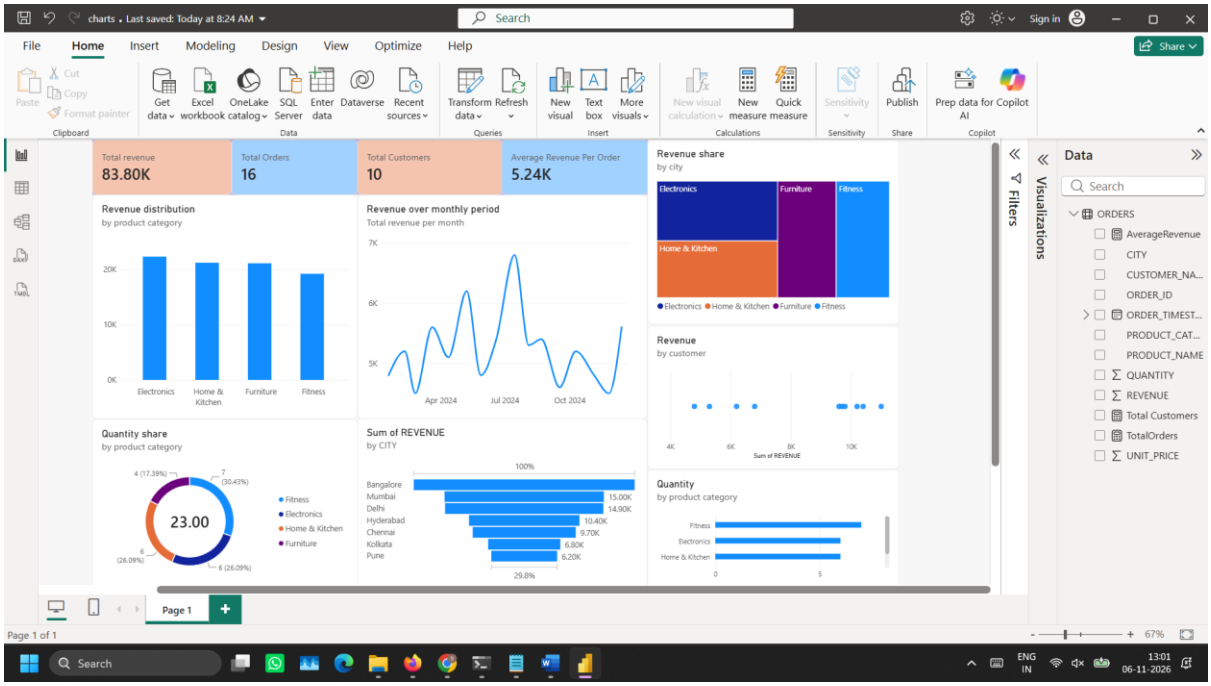

- Choose ‘Import’ as data source mode.

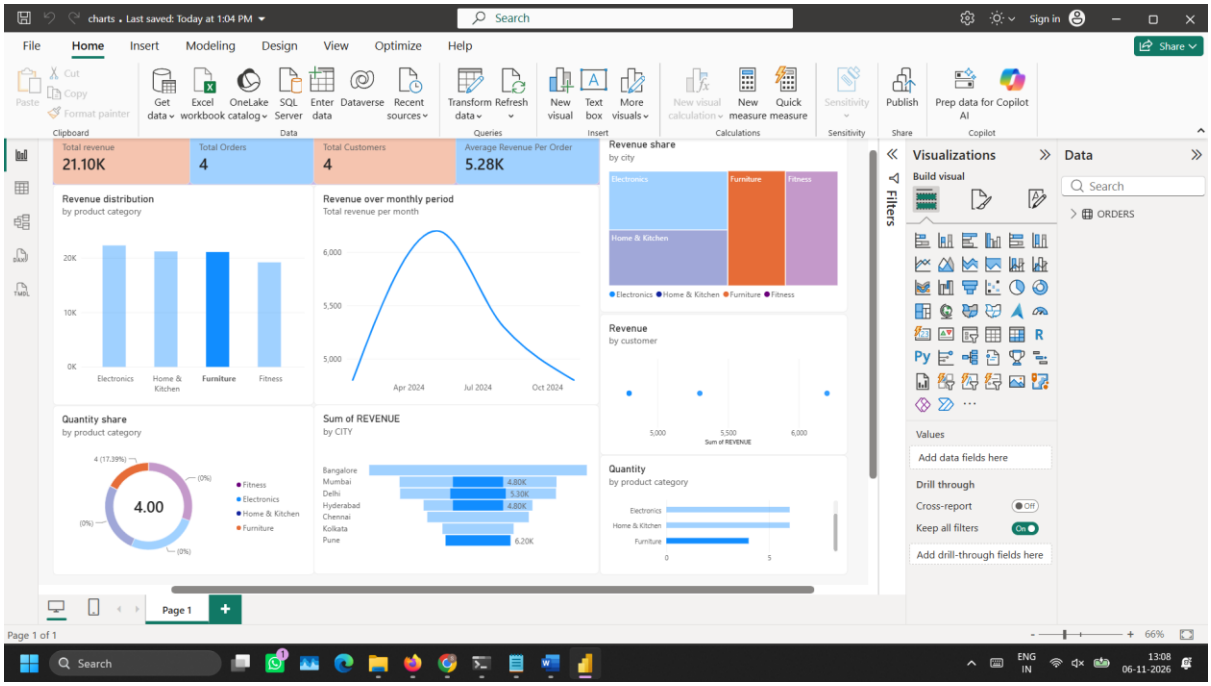

8.) Click on ‘Close and Apply’ button on Home tab after performing transformation.

9.) Use various visualization charts and cards in ‘view reports’ area to create a dashboard

10.)Click on any category to filter and view information related to that selected category

11.)Delete database and warehouse in Snowflake

```
DROP DATABASE AJI_DB_V3;

DROP WAREHOUSE AJI_WH_V3;
```
